

Bethany Joss

This Pulaski Academy and Central School alumna is playing an important role in keeping cancer patients on the road to recovery.

Bethany Joss, a 2000 PACS graduate, works as a certified pharmacy technician at Hematology Oncology Associates of CNY.

“My role is to continue dispensing oral chemotherapy medications to patients undergoing treatment for their cancer diagnosis or blood disorder,” said Joss. “I can’t stop doing my job because of this virus. If I do, my patient’s progress -- and their lives -- can be taken from their cancer.”

Joss said she worries for her patients’ safety more than her own, as she is not immunocompromised, and they are.

“Wash your hands, stay at home if possible, use hand sanitizers if you go out and wear a mask to protect yourself and others,” said Joss.
