November 10, 2021

Dear Parents/Guardians:

The Pulaski School District is streamlining our communication process regarding positive COVID case notification to parents. Starting today, we will no longer be utilizing our robocall system to notify parents of a positive case in our school community. Instead, parents should refer to the NYS COVID-19 Report Card website which provides local and regional data on COVID in schools. The COVID-19 Report Card, linked here and from our school webpage, includes detailed information on the number of students, teachers, and staff that have tested positive at each of our schools.

It is important to note that parents of children who have been determined by contract tracing to be close contacts to a positive case will continue to be notified directly by the school.

We remain committed to doing all we can to provide for the safety and well-being of the staff, students and families of our school district. Please do not hesitate to contact my office or your child’s school with questions.

Sincerely,

Tom Jennings, Superintendent
